

Steel Crowd Control Interlocking Barricade

Equicross ... a leading provider of quality safety, crowd, and traffic control equipment

Crowd & Traffic Control Barricade. Hot dipped galvanized steel for long life. Heavy duty construction with 16-gauge 1.5" frame. Built-in interlocking hooking mechanism for positive perimeter crowd control. Each barricade measures 43" tall. Available in 6.6' and 8' lengths, with detachable bridged or flat feet. 8' flat foot model weighs 57 lbs and has thick 12mm 2" x 24" stem welded flat feet. 8' bridged foot model weighs 52 pounds. Vertical bars are 15mm in diameter and spaced 5" apart. Easily stackable for storage and transportation.

Bridged feet are best for uneven surfaces or outdoors and provide maximum stability and resistance to crowds. Flat feet are designed to be used on flat surfaces where crowds will be walking parallel to the barricades or in close proximity to vehicles to minimize trip hazards and damage caused by vehicles running over the bases.

Specifications:

Material: Hot Dipped Galvanized Steel

Weight: 8' Flat foot 57 lbs, 8' Bridged Foot 52 lbs

Height: 43"

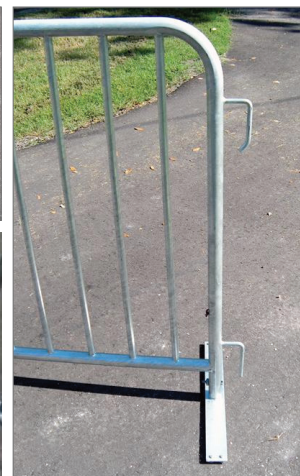

Width: 6.6' and 8'

Frame Dia.: 38mm OD

Vertical Bars Dia.: 15mm OD

Features and Benefits:

- > hot dipped 16-gauge galvanized steel for long life
- > built-in interlocking hooking mechanism
- > easily stack and store
- > 43" tall
